Full-stack engineer (PHP / Vue 3 / React) shipping production WordPress products and small AI dev-tooling. Part of the team behind **Fluent Forms** (700K+ active installs) and **Fluent Player** at WPMageNinja. On the side, I publish open-source agent context, MCP, and CLI tools on npm — most recently **mincut-context**, a graph-based context selector for AI coding agents.

~ EXPERIENCE

Senior Software Engineer @ WPMageNinja 2022 — Now

PHP · Vue 3 · React · Gutenberg blocks · Element Plus · MySQL · REST · Tailwind · Vite · PHPUnit · Playwright

- Build and maintain features across **Fluent Forms** free & pro (form builder used by 700K+ active sites) and **Fluent Player** (video player for WordPress) — server-side PHP, admin Vue 3 SPAs, Gutenberg blocks, and REST APIs.
- Ship vertical slices end-to-end: PHP services and policies, Vue admin UIs, public form runtime, and the conversational/save-and-resume flows; integrations include payments, Mailchimp, FluentCRM, BunnyCDN, Mux.
- Cover behaviour with PHPUnit + Playwright; use PHPStan and a custom pre-PR review pipeline to keep a long-lived plugin codebase shippable.
- Contribute add-ons and helpers: WooCommerce bridge, Calculation Captcha, NOC manager, plus internal tooling that speeds team review and release.

Web / Front-End Developer · Network Engineer 2019 — 2022

React · Node.js · ASP .NET · MSSQL · MongoDB · networking

- Link3 Technologies Ltd.** — Network engineer at one of Bangladesh's largest ISPs; ran network operations and customer-side service work.
- Manaknight Digital Inc.** — Web developer; full-stack feature work across React frontends and Node services.
- CodeMonk** — Front-end engineering on production SPAs; React + Node + Mongo work for client-facing apps.

~ SELECTED OPEN-SOURCE & SIDE PROJECTS

- mincut-context** — Token-minimal context selection for AI coding agents (symbol graph + personalized PageRank + budget-constrained min-cut). [TypeScript](#) · [npm](#) · [261 tests](#) · [88.6% cov](#)
- codex-map** — Visual dashboard for inspecting and mapping your Codex CLI setup. [JavaScript](#) · [npm](#)
- codex-claude-bridge** — Use Claude Code from inside Codex; MCP server plus helper CLI. [JavaScript](#) · [npm](#) (@dhrupe/codex-claude-bridge)
- workmem** — Recheck-backed working memory for AI coding workflows; compresses context packets and remembers prior findings. [JavaScript](#)
- growth-insights** — Laravel + Vue dashboard turning GitHub activity into growth signals with Gemini-enhanced weekly coaching. [PHP](#) · [Vue 3](#) · [Element Plus](#) · [ECharts](#)
- local-chat** — LAN chat with realtime text and WebRTC voice/video; Reverb + Echo transport. [Laravel 12](#) · [Vue 3](#) · [WebRTC](#)
- notifix** — WordPress plugin for realtime social proof via an adapter-based event pipeline (Pusher / Ably). [PHP](#)
- fluent-noc** — WordPress NOC manager with Gutenberg-block PDF templates, QR-verified certificates, and email pipeline. [PHP](#)

~ SKILLS

LANGUAGES	PHP · JavaScript · TypeScript · HTML · CSS · SQL
FRONTEND	Vue 3 · React · Gutenberg blocks · Element Plus · Tailwind · Vite · Webpack
BACKEND	WordPress · Laravel (10 / 11 / 12) · Node.js · MySQL · REST APIs · Reverb / Echo
AI / TOOLING	MCP servers · Codex / Claude Code workflows · npm publishing · GitHub Actions · PHPUnit · Playwright · PHPStan · Infection
ALSO	WebRTC · Docker · Git · accessibility (WCAG AA) · pre-PR review automation

~ EDUCATION

B.Sc. Computer Science & Engineering · Metropolitan University, Sylhet graduated 2019

~ LANGUAGES

English · Bengali · Hindi — all at working-conversation level.
