

Full-stack engineer (PHP / Vue 3 / React) shipping production WordPress products and small AI dev-tooling. Part of the team behind **Fluent Forms** (700K+ active installs) and **Fluent Player** at WPMageNinja. On the side, I publish open-source agent context, MCP, and CLI tools on npm — most recently **mincut-context**, a graph-based context selector for AI coding agents.

~ EXPERIENCE

Senior Software Engineer @ WPMageNinja · remote 2022 — Now

PHP · Vue 3 · React · Gutenberg blocks · Element Plus · MySQL · REST · Tailwind · Vite · PHPUnit · Playwright

- Build and maintain features across **Fluent Forms** free & pro (form builder used by 700K+ active sites) and **Fluent Player** (video player for WordPress) — server-side PHP, admin Vue 3 SPAs, Gutenberg blocks, and REST APIs.
- Ship vertical slices end-to-end: PHP services and policies, Vue admin UIs, public form runtime, and the conversational/save-and-resume flows; integrations include payments, Mailchimp, FluentCRM, BunnyCDN, Mux.
- Cover behaviour with PHPUnit + Playwright; use PHPStan and a custom pre-PR review pipeline to keep a long-lived plugin codebase shippable.
- Contribute add-ons and helpers: WooCommerce bridge, Calculation Captcha, NOC manager, plus internal tooling that speeds team review and release.

Web / Front-End Developer · remote & freelance 2019 — 2022

ASP .NET · React · Node.js · MSSQL · MongoDB · jQuery · Bootstrap

- Shipped client-facing web apps as front-end developer (remote) and earlier as an ASP .NET developer; covered Technical Support Engineer responsibilities in between roles.
- Stack ranged from React + Node + Mongo SPAs to ASP .NET MVC backends on MSSQL; first exposure to maintaining production codebases used by paying customers.
- Companies and exact dates: ask me — I'll plug them in once you share.*

~ SELECTED OPEN-SOURCE & SIDE PROJECTS

mincut-context	Token-minimal context selection for AI coding agents — symbol graph + personalized PageRank + budget-constrained min-cut. npm · TypeScript · 261 tests · 88.6% cov.	codex-map	Visual dashboard for inspecting and mapping your Codex CLI setup. npm · JavaScript.
codex-claude-bridge	Use Claude Code from inside Codex — MCP server + helper CLI. npm (@dhruo/codex-claude-bridge).	workmem	Recheck-backed working memory for AI coding workflows — compresses context packets and remembers prior findings.
growth-insights	Laravel + Vue dashboard turning GitHub activity into growth signals; Gemini-enhanced weekly coaching. Element Plus · ECharts.	local-chat	Laravel 12 + Vue 3 LAN chat with realtime text + WebRTC voice/video; Reverb + Echo for transport.
notifix	WordPress plugin: realtime social proof via an adapter-based event pipeline (Pusher / Ably transports, normalized event store).	fluent-noc	WordPress NOC manager — Gutenberg-block PDF templates, QR-verified certificates, email pipeline.

~ SKILLS

LANGUAGES	PHP · JavaScript · TypeScript · HTML · CSS · SQL
FRONTEND	Vue 3 · React · Gutenberg blocks · Element Plus · Tailwind · Vite · Webpack
BACKEND	WordPress · Laravel (10 / 11 / 12) · Node.js · MySQL · REST APIs · Reverb / Echo
AI / TOOLING	MCP servers · Codex / Claude Code workflows · npm publishing · GitHub Actions · PHPUnit · Playwright · PHPStan · Infection
ALSO	WebRTC · Docker · Git · accessibility (WCAG AA) · pre-PR review automation

~ EDUCATION

B.Sc. Computer Science & Engineering · Metropolitan University, Sylhet graduated 2019

~ LANGUAGES

English · Bengali · Hindi — all at working-conversation level.
